## **DETAILED ACTION**

### ***Information Disclosure Statement***

1. The information disclosure statement (IDS) submitted on 10-28-2003 has been considered by the examiner.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 1 and 8 recite a contact roll member that does not contact. Please clarify.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Kunzmann et al. (5,613,173). The contact roll member by Kunzmann et al. teaches a clipped oscillating voltage signal for the contact roll.

### ***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2852

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kunzmann et al. in view of Sato et al. (6,778,797). Kunzmann et al. teaches a clipped ac input for a charging roll. Kunzmann et al. does not teach a non-contact contact roll.

Sato et al. teaches a non contact roll for charging. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the teaching of Kunzmann et al. with a non-contact roll such as taught by Sato et al. to reduce strobing (Kunzmann et al.; column 3, lines 5-9).

#### ***Prior Art of Record***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Facci et al. teaches pertinent prior art.
